OUR HISTORY

ABOUT US

S&N Labels is a leading manufacturer and supplier of reliable and quality labels, printers and media to mark goods that move through the supply chain in FMCG, retail, transport and logistics, healthcare, and industrial sectors in southern Africa.

We provide a comprehensive range of products, including large run blank VIP labels, laser sheets, full-colour product labels, thermal transfer labels, price marking labels, tools and accessories, the Inkanto range of thermal transfer ribbons, as well as global brands of printers, hardware and software from partners such as BarTender, Datalogic, Honeywell and Zebra.

As a leading provider in the labelling industry, S&N Labels has a large capacity 4 000 square metre factory in Spartan, Johannesburg, geared for big print runs, which is run by 75 highly-trained staff, offering a wide range of printing capabilities, including self-adhesive label converters and printing presses with blank through to 8-colour capability.

We have a national presence with channel representatives in all major centres in South Africa, and a Level 3 B-BBEE contributor status.

Total self-adhesive label solutions

A complete solution for your business!

We have a long track record of producing labels that mark goods through the supply chain across FMCG, retail, transport and logistics, healthcare and industrial sectors in southern Africa.

OUR QUALITY STANDARDS

The mark of responsible forestry
FSC® C175663

FSC®

•We are committed to ensuring that all our paper-based label materials are ethically sourced from sustainable forests and is now FSC® Chain of Custody-certified (FSC-C600040).

ISO 9001:2015

•By obtaining our ISO 9001:2015 Quality Management System certification this ensures that we consistently meet the needs and expectations of our customers and adhering to the highest standards of quality management.

BBBEE

•We are a Level 3 BB-BBE contributor status, which enables customers to claim 110% of their procurement spend for their own scorecard.

WHY CHOOSE US

We provide a total labelling solution to meet our customers' needs - from quality labels and tags to all the hardware, media and software you need to print your own labels.

Self-Adhesive Labels & Tags

S&N Labels provides a comprehensive range of self-adhesive labels and tags for a large range of applications across FMCG, retail, transport and logistics, healthcare, government and industrial sectors across southern Africa.

Our range includes product labels, direct thermal and thermal transfer labels and price-marking labels and tags. With our comprehensive printing facilities at our plant in Spartan, we specialise in blank, spot and full-colour label conversion for long runs of labels, offering a wide portfolio of finishes and print techniques. When protection of the printed surface is required, labels can be varnished or over-laminated.

Our high-quality tags are used through the FMCG and retail sectors for applications where a label cannot be adhered to a surface or a product.

Our plain or printed labels or tags can be supplied as single items or in reels or packs (with or without sprockets), with punched eyelets or die-cut to facilitate fastening. Variable information can be printed onto continuous labels and tags using direct thermal or thermal transfer printers.

Our experts can advise you on which self-adhesive label or tag will suit your application.

With years of expertise in the labelling industry, we match the substrate with the application, whether you outsource your printing to us, or you have in-house printing facilities. Our fit-for-purpose labels are printed onto semi-gloss, polypropylene, matt, cast gloss, laser, and various grades of thermal transfer materials.

Total self-adhesive label solutions

A complete solution for your business!

We provide a total labelling solution to meet your customers' needs – from quality labels and tags to all the hardware, media and software you need to print your own labels.

As the blank canvas for your label design, we offer a wide library of paper, boards and synthetic label stock on which we can print. Recycling is an important consideration for S&N Labels and to optimise sustainability, we recommend ensuring that both the label and package can be recycled as a single unit, which necessitates the compatibility of both materials. Recyclable combinations include paper/cardboard, PE/PE and PP/PP.

The adhesive is one of the most technically important components of the label. Whether your labels are required to stick for long periods of time, are exposed to demanding conditions or need to be easily removed, our range of adhesives offers a solution for every application.

Variable Information Printing Bureau

For customers wanting to outsource their printing, we offer the services of our Variable Information Printing Bureau to print variable information using thermal transfer or digital technology. Examples include warehouse racking labels, sequentially numbered labels and other specialty applications.

Price-marking Systems

S&N Labels is a key partner of the internationally recognised Meto range of hand labellers in southern Africa. Meto products are ideal for retail applications and are considered to be the market leaders in labellers due to their attention to the highest quality standards, robustness as well as ongoing R&D and innovation.

Meto hand labellers offer maximum efficiency as they are ergonomically shaped and allow characters and digits to be selected in a swift, straightforward and flexible manner.

Our comprehensive range of Meto hand-held price-marking guns are used for applying labels to items, with the model selection determined by the label size and price configuration. They are ideal for expiry date and price labels for batch applications in the FMCG and retail sectors.

We also offer a repair service which includes band replacement.

Tagging Systems

Swing tickets and tags, which indicate information such as the price and the size, are only effective if they are securely attached to the item.

S&N Labels has been providing tagging technology for many years and offers a range of fast, safe and reliable tagging guns for a variety of industries, from apparel and automotive to manufacturing and packaged consumer goods.

Most tagging systems use a tagging gun and needle to insert the fastener through the fabric. Basic options relate to fabric delicacy, the distance the tag needs to hang from where the fastener will be attached and how strong the fastener needs to be.

We offer a tagging solution for every application, from tagging and identification to bundling and pairing. Our range includes the relevant tools, needles and fasteners to ensure secure attachment of tags. We also supply tags with a number of printing, paper stock and finishing options.

Thermal Transfer Ribbons

S&N Labels is the largest Tier 1 distributor of Inkanto thermal transfer ribbons (TTR) in sub-Saharan Africa. Inkanto's range of high-quality thermal transfer ribbons is suited to a variety of applications from appliance rating labels, barcode labels, chemical labels, food labelling and marking, pharmaceutical labels, printed circuit board electronic labels to product and pricing labels.

The range includes:

Wax Ribbons – these ribbons offer economy and quality and are ideal for printing variable information on barcode, identification and logistics labels.

Resin Ribbons – these ribbons offer high resistance and durability and are ideal for printing variable information on labels and flexible packaging.

Wax-Resin Ribbons – these ribbons offer performance and versatility and are ideal for demanding print applications.

Total self-adhesive label solutions

A complete solution for your business!

We provide a total labelling solution to meet your customers' needs – from quality labels and tags to all the hardware, media and software you need to print your own labels.

Barcode & Label Printers

S&N Labels offers a comprehensive range of direct thermal and thermal transfer printers for all applications. Our range includes desktop label printers, industrial label printers and mobile or portable printers from leading brands, Honeywell and Zebra.

We also offer repairs at our national Repair Centre, where our certified technicians repair printers to OEM standards.

Barcode Scanners

We partner with leading providers of global brands of barcode scanners, which include Honeywell and Zebra, and offer a comprehensive range to choose from, to suit your application and environment. The range includes general purpose scanners for retail or commercial environments, industrial rugged scanners for harsh industrial applications and specialised healthcare scanners.

Software

Our software range includes BarTender by Seagull Scientific, which offers a comprehensive range of barcode labelling software to design, automate and manage labels, barcodes, RFID tags and more.

BarTender® software helps improve safety, security, efficiency and compliance through easy, powerful design; fast, accurate printing on demand; comprehensive system control; straightforward integration and legendary technical support.

Repair Centre

Ensuring your label, marking and tagging hardware is always operational and up and running is key to the smooth running of your operation.

We understand that this hardware is often mission-critical and that interruptions can result in loss of production and income.

To meet this need, we have a national Repair Centre where our trained and certified technicians repair the hardware that we supply – including printers, scanners, mobile computers, price marking and tagging guns – to OEM standards.
